

No. of Functional Features Included in the Solution

Date	03 October 2026
Team ID	SWTID-2026-5999
Project Name	PocketSmart AI — AI-Assisted Goal-Based Budget Planner
Maximum Marks	5 Marks

Functional Features

S.No	Feature	Description	Component	Status
1	User registration	Validated account creation with hashed passwords	auth.py, main.py	Done
2	Login and logout	Signed session token, protected routes and logout handling	auth.py	Done
3	Home budget planner	Plans lights, fans, furniture, dining tables and selected rooms	main.py, gemini_utils.py	Done
4	Event budget planner	Allocates event spending among venue, food, decoration and entertainment	main.py, gemini_utils.py	Done
5	Jewelry planner	Uses occasion/preferences and optional outfit image for recommendations	main.py, gemini_utils.py	Done
6	Budget verification	Recomputes totals and removes items when the plan exceeds the limit	gemini_utils.py	Done
7	Shopping search links	Creates category-specific external search links	gemini_utils.py	Done
8	Saved history	Stores and retrieves a user’s completed plans	database.py	Done
9	Dashboard	Shows planner entry points and recent activity	dashboard.html	Done
10	AI fallback	Provides a standard plan when Gemini is unavailable or unusable	gemini_utils.py	Done
11	Input and upload validation	Checks ranges, required fields, image types and image size	models.py, main.py	Done
12	Print-friendly result	Allows the generated plan to be saved through the browser’s print function	styles.css	Done

Feature Summary

Metric	Value
Features documented	12
Core planning features	5
Supporting features	7
Automated test suite included	Yes

Metric	Value
Direct payment integration	Not included

Feature Philosophy

The project focuses on the complete planning loop: **collect** → **generate** → **verify** → **save** → **continue shopping**. Features that would require retailer contracts, payment processing or live inventory are deliberately kept outside the current scope.
