

Demonstration of Proposed Features

Date	03 October 2026
Team ID	SWTID-2026-5999
Project Name	PocketSmart AI — AI-Assisted Goal-Based Budget Planner
Maximum Marks	1 Mark

Demonstration Checklist

S.No	Feature	Description	Status	Demonstrated
1	Account creation and login	Create an account and access protected planning pages	Implemented	Yes
2	Home budget planning	Generate a fixed-budget home setup plan	Implemented	Yes
3	Event budget planning	Generate a plan based on guests, event type and selected services	Implemented	Yes
4	Jewelry planning	Generate occasion-based recommendations with optional outfit image	Implemented	Yes
5	Budget verification	Recalculate and constrain the final plan	Implemented	Yes
6	External search links	Continue shopping research from recommendation items	Implemented	Yes
7	Saved history	Reopen previously generated plans	Implemented	Yes
8	AI fallback and validation	Continue safely when AI is unavailable or input is invalid	Implemented	Yes
9	Live retailer price API	Replace search links with live inventory and price data	Future	No

Demonstration Message

The key point to demonstrate is not only that the AI can generate recommendations, but that the application **checks the recommendation before accepting it**. This shows the separation between generative output and application rules.
